### REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior does not teach /or suggest all of the limitations of the claimed invention of manufacturing an acceleration sensor including:

- applying a conductive paste on a surface of at least one of the green sheets at positions corresponding to a center portion and two end portions of individual piezoelectric elements in the longitudinal direction, so as to form a plurality of segmented electrodes for a plurality of piezoelectric elements,
- applying a conductive paste on a surface of at least one of the other green sheets such that the conductive paste is led to a position corresponding to one end of each of the plurality of piezoelectric elements in the longitudinal direction, whereby first lead electrodes are formed for the plurality of piezoelectric elements;
- applying a conductive paste on a surface of at least one of the other green sheets such that the conductive paste is led to a position corresponding to the other end, opposite to the one end, of each of the plurality of piezoelectric elements in the longitudinal

direction, whereby second lead electrodes are formed for the plurality of piezoelectric elements;

- stacking the green sheets such that the segmented electrodes and the first lead electrodes or the second lead electrodes are alternately arranged in such a manner that one of the segmented electrodes is positioned between a pair of the first lead electrodes

Accordingly, claim 9 is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tai Van Nguyen whose telephone number is 571-272-4567. The examiner can normally be reached on M-F (7:30 A.M - 4:30 P.M).
